

# JAFUJI NON MAGNETIC V BLOCKS

QUALITY, RELIABILITY AND VALUE FOR MONEY

These V-Blocks are very useful for inspection in tool room and standard room.

The V-Blocks have U-Clamps, by means of which the work piece can be held tightly in the V of the block. The accuracy of parallelism of the 'V' with respect to bottom, its squareness to the two end faces, and the maximum permissible variation in height between two V-Blocks in a pair, is within  $\pm 3$  microns.

All JAFUJI Hardened V blocks are supplied along with calibration certificate of NABL accredited lab.

### Specification :

Sl.No.	Model	Clamping Range	Length x Width x Height
1.	JSV 401	5 - 30 mm	50 x 40 x 40 mm
2.	JSV 402	6 - 50 mm	80 x 63 x 63 mm
3.	JSV 403	6 - 70 mm	100 x 80 x 80 mm
